

## ORDER SET Dictionary

### Mnemonic:

Mnemonic has three sections: eg.

**ON** – denoting oncology order set OR - HA – denoting haematology order set

**BR** – denoting diagnosis or tumour site (eg BR = Breast) see full list below.

This list follows the local Derby-Burton cancer network website regimen list.

**Last 6 characters** to denote regime in terms of drug or regime code and if possible other information to help selection, eg numbers if more than one order set for a regimen.

<b>BLADDER</b>	Bladder Urological Cancer
